Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this
 Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by McCarty (2714326).

McCarty discloses a system and method for mounting and adjusting the height of a bridge or tailpiece component to an instrument body comprising a component having stud apertures with a slot at each end of the component and a mounting device comprising a top portion and a threaded lower portion (see figure 4), the threaded bottom lower portion being positioned in the stud aperture (see figure 3) where the mounting device clamps and mounts the component in position between the top portion of the mounting device and a plate of an insert that is aligned with a lower threaded bottom portion mounted into the instrument body (see figure 6). McCarty further discloses the use of an adjustment screw extending from one side of the component to each stud aperture to laterally position the component relative to the insert and mounting stud(see figure 4).
